NCCHPP Internal Tool Health Impact Assessment (HIA) Screening Grid

July 2014 Version

Background:

The NCCHPP gives various training sessions on Health Impact Assessment for which it has developed some tools for the purpose of interactive exercises. These screening and scoping tools can be useful for HIA practitioners and those gathering more information on how to perform these steps. The screening grid and the process-scoping tool are inspired by international best-practices standards recognized within this field (amongst others, Quigley et al., 2006, and Bhatia, Branscomb, Farhang, Lee, Ornstein & Richardson, 2010).

If you wish to become more familiar with the five steps of HIA, please consult the NCCHPP's introduction to HIA, available here: http://www.ncchpp.ca/133/Publications.ccnpps?id article=302

Result: Tendency towards doing an HIA	To your knowledge:	Result: Tendency away from doing an HIA
Yes	1. Is there real potential to influence the decision-making process?	No
Yes	2. Are the minimum resources needed to carry out an HIA available at this moment?	No
Yes	3. Is there sufficient information on the policy/project to be able to assess the health impacts?	No
Yes	4. Are the potential impacts (positive and negative) sufficiently important to continue the analysis? (See the results of the analysis using the grid on the determinants of health on the next pages.)	No
	5. What is the likelihood that the health impacts of this policy/project are more pronounced for disadvantaged groups (e.g., low income, elderly, disabled)? (Refer to the column "Affected populations" in the grid on the next pages.)	
High	Positive health impacts	Low
High	Negative health impacts	Low

Determinants of health	Yes Negative impact	Yes Positive impact	No impact	Affected populations	Comments
Lifestyle and behaviour

SUGGESTED CITATION

Mendell, A. & St-Pierre, L. (2014). *Health Impact Assessment (HIA) Screening Grid*. Montréal, QC: National Collaborating Centre for Healthy Public Policy.

The National Collaborating Centre for Healthy Public Policy (NCCHPP) seeks to increase the expertise of public health actors across Canada in healthy public policy through the development, sharing and use of knowledge. The NCCHPP is one of six centres financed by the Public Health Agency of Canada. The six centres form a network across Canada, each hosted by a different institution and each focusing on a specific topic linked to public health. In addition to the Centres' individual contributions, the network of Collaborating Centres provides focal points for the exchange and common production of knowledge relating to these topics. The National Collaborating Centre for Healthy Public Policy is hosted by the Institut national de santé publique du Québec (INSPQ), a leading centre in public health in Canada.
