À quoi sert le dépistage?

À savoir si la politique, programme ou projet proposé doit être soumis à une ÉIS

Dépistage

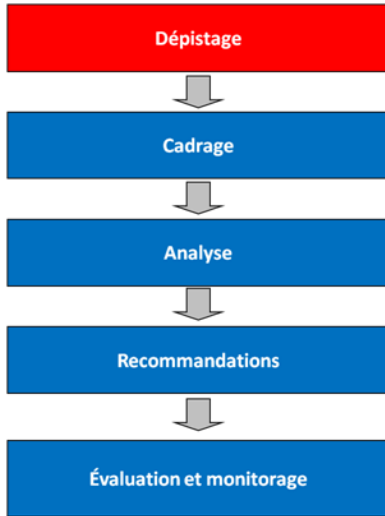

1. Lecture du contexte de la politique

- Il est possible d'influencer le projet de politique ?

2. Lecture préliminaire des impacts potentiels

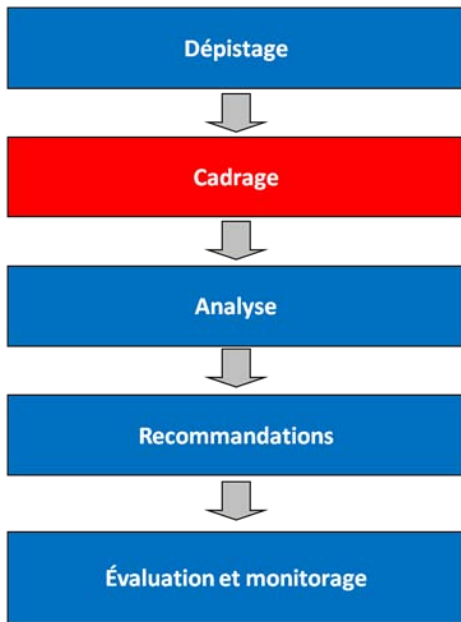

- Impacts positifs et négatifs ?
- Assez importants pour aller plus loin?

Exemple:Outil de dépistage

9. The provision of quality housing <i>The link between housing and health is well recognised, with poor housing particularly associated with ill health in children. Housing is acknowledged to affect health.</i>				
4. Personal supportive networks <i>People benefit from relationships with friends, colleagues and family.</i>				
10. The natural quality, through affect health? <i>The natural quality, through affect health?</i>	Will the policy have an effect on:	Populations affected	Description of health impact (+ or - ?)	Action
5. People's decisions <i>If people's decisions affect health?</i>	Example – screening an Economic Development Strategy 1. Income levels and the distribution of wealth <i>It is recognised that there is a potential link between people's income and health – wealthier people tend to be healthier. Will the policy reduce inequalities in income?</i>	Parents / Guardians Whole population in targeted wards	+ Support for employers offering integrated childcare services, making it easier for parents to work + Initiatives to respond to deprivation related issues - People resenting being 'labelled' as living in a deprived area once initiatives are targeted there from 'outside'	* Promote support offered to encourage this approach to others * Involving local residents at all stages of initiatives to shape what's really needed
11. The natural quality about urban program <i>The natural quality about urban program</i>	6. Physical environment <i>Physical environment impact community</i>			
12. Monitoring and policy address: <i>Monitoring and policy address:</i>	7. Education <i>Education factors as basic community</i>			
13. The social groups: <i>The social groups:</i>	8. Health <i>Health activity smoking Will the</i>			
	2. Employment <i>Employment gives us income, a sense of purpose and structure to our lives– which all affect health. Will the policy improve employment opportunities for all parts of the community?</i>			
	3. Healthy beginnings for children <i>Children need positive environments in which to develop and grow; and parents and guardians need to be able provide the foundations to make this happen. Will the policy support healthy beginnings for children?</i>
